

$$1) 2,5 - 567,500 = -567$$

$$2) 2\frac{5}{10} - 567\frac{500}{1000} = \frac{25}{10} - \frac{567500}{1000} = \frac{250000 - 567500}{1000} =$$

$$= -\frac{317500}{1000} = -317,5$$
