

3a меопаново тигарово

$$CB = \sqrt{AB^2 - AC^2} = \sqrt{625 - 225}$$

$$= \sqrt{400} = 20 \text{ cm.}$$

$$\text{tg } A = \frac{CB}{AC} = \frac{20}{15} = \frac{4}{3} = 1\frac{1}{3}$$

$$\text{tg } B = \frac{AC}{BC} = \frac{15}{20} = \frac{3}{4}$$
